The cattle tick carrier/s are accurately described on a movement record¹, number:

and were treated by either:

Name of approved chemical

Applied by

spray pour on plunge dip injection

Application date

Name of approved chemical

Applied by

spray pour on plunge dip injection

Application date

OR

were held in a cattle tick free environment for a minimum of 35 days;

Type of environment cattle tick carriers held upon

cattle yard/s feedlot

Entry date

Exit date

OR

Cattle that have been subjected to a manual inspection in accordance with (MI-HRC) by the owner and have met the risk minimisation requirement of 'tick free' on

'Tick free' date

Certification

I declare that:

- I am the relevant person² of the cattle tick carriers described fully and accurately described on the movement record;
- The cattle tick carrier/s described have undergone the treatment specified above for cattle tick so that they can be reasonably expected to be cattle tick free;
- The information provided by me on this declaration is true and correct; and
- The conveyer/drover of the cattle tick carrier/s will provide this completed risk minimisation declaration to the accredited certifier.

Note

1. The treatment must be to a standard that should ensure cattle tick carriers are tick free when presented for inspection.
2. The Biosecurity Manual (Cattle Ticks) provides guidance on the intervals from the last preliminary treatment within which the stock can be presented to an accredited certifier:
 - acaricides - by spraying or plunge dipping - a minimum period of four (4) days and a maximum of seven (7) days; or
 - endectocides - [Macrocyclic lactones that have a full claim for the control of cattle ticks] by injection or pour on - a minimum period of six (6) days and a maximum of nine (9) days.

¹Movement record means a national vendor declaration (NVD) or other document (however called) completed under a law of another State that complies with, or substantially complies with, the requirements of a movement record.

²Relevant person under the *Biosecurity Act 2014*.
