BLOCK RANGE

Minarea with 3% Urea - is a multi-mineral supplement designed to balance any mineral deficiencies in the rumen, which will affect bacterial function thus reducing feed conversion. Balancing these essential elements is the efficient breakdown of feed consumed by the animal. Six trace elements required for effective rumen function of copper, cobalt, iron, zinc, manganese, iodine and selenium are all readily available in Minarea. Available in 19KG.

Urea	3.0%	Ferrous Iron	1365mg/kg
Salt	61.0%	Cobalt	43mg/kg
Molasses	7.0%	Iron	1859mg/kg
Calcium	4.2%	Copper	500mg/kg
Magnesium	.02%	Iodine	287mg/kg
Sulphur	.17%	Zinc	180mg/kg
Phosphorous	4.2%	Manganese	62mg/kg

Superphos 8% + Selenium - is a proven phosphorous supplement designed for pastures deficient in (P). It is a multi-nutrient supplement for all livestock increasing energy metabolism, growth, digestive function and improved sustained fertility and lactation. Phosphorous is typically reduced in wet season pastures. Increasing (P) will improve herd fertility and increase in weight gain. Superphos 8% with added selenium an essential trace mineral promoting key antioxidant activity, including fertility, udder health and immunity. Available in 20KG.

Bypass Protein Meal	3.5%	Selenium	26mg/kg
Molasses	4.0%	Zinc	320mg/kg
Salt	46.0%	Copper	1250mg/kg
Phosphorus	8.0%	Cobalt	15mg/kg
Calcium	9.0%	Fluorine	2000mg/kg

Trace Element with Copper & Cobalt - a supplement used for ruminants to correct deficiencies in trace elements which can reduce growth and reproductive rates and result in less efficient feed conversion and depressed immunity. Available in 20kg.

Molasses	5.0%	Copper	1000mg/kg
Salt	45.0%	Cobalt	65mg/kg
Calcium	14.5%	Ferrous Iron	1350mg/kg
Phosphorus	0.6%	Iron	650mg/kg
Sulphur	0.8%	Iodine	1500mg/kg
Magnesium	0.02%	Selenium	26mg/kg

Dominator plus 10% Urea - is a molasses based protein supplement specifically formulated to assist stock utilize available dry feed. It contains liquid sea minerals which helps balance the microbial activity within the rumen supporting weight gain. It has the ability to improve the rate of digestion, increase consumption of available feed and reduce weight loss in limited and rank pasture conditions. Dominator offers superior intake control of protein, increasing protein conversion making this block efficient and economical choice for cattle production. Available in 15kg & limited stocks of 40kg.

Molasses	57.6%	Calcium	5.1%
Bypass Protein Meal	4.0%	Salt	4.0%
Phosphorus	1.7%	Urea	10%
Liquid Sea Minerals	5.0%	Selenium	26mg/kg

12% High Sulphur - provides sulphur and minerals that are essential in developing bacteria in the rumen. Sulphur should be available to livestock at all times, as it is important to the growth and survival of fungi in the rumen which are essential in assisting the rumen bacteria in deriving essential nutrients from dry and fibrous feeds. Available in 20KG.

Salt	Max 80%	Molasses	4%
Sulphur	12%		

Dry Season plus 10% Urea - a supplement used for ruminants to correct deficiencies in trace elements which can reduce growth and reproductive rates and result in less efficient feed conversion and depressed immunity. Available in 15KG.

Urea	10.0%	Cobalt	210mg/kg
Molasses	49.0%	Copper	250mg/kg
Salt	4.0%	Selenium	26mg/kg
Calcium	5.6%	Ferrous Iron	800mg/kg

Blue Caviar Horse Block - is a multi-mineral block for horses grazing on all pastures and conditions. It is a valuable supplement as it is a means of ensuring that your horses are receiving the necessary minerals important for growth and performance. Blue Caviar contains Biotin which is essential for good hoof health Available in 2KG brick.

Calcium	8.0%	Molasses	46.0%
Cobalt	.03%	Potassium	.09%
Magnesium	4.8%	Zinc	.02%

Peak 50 Horse Block - is designed to provide protein to assist pasture digestion and to keep breeding stock performing at peak condition during stressful periods and when feed rations do not provide sufficient protein. Available in 16KG.

Lupins	25%	Molasses	10.0%
Salt	33%	Sulphur	2.5%

Cattle Tranz Water Soluble Mineral Supplement - aids in reduction of weight loss and stress levels during transit and weaning times. Comes in 8 x 150gm tablet form containing a balanced array of essential minerals, glucose and fructose needed for normal metabolism.

Salt	20.92%	Glucose	2.2g/100g
Potassium	2.51%	Fructose	1.8g/100g
Magnesium	.3%	Maltose	.2g/100g
